Foreword

The Standards of Learning in this publication represent a major development in public education in Virginia. These standards were adopted in May 2000 by the Virginia Board of Education to emphasize the importance of instruction in the fine arts—music, dance arts, theatre arts, and visual arts.

The Music, Dance Arts, Theatre Arts, and Visual Arts Standards of Learning are an important part of Virginia's efforts to provide challenging educational programs in the public schools. Knowledge and skills that students acquire through fine arts instruction include the ability to think critically, solve problems creatively, make informed judgments, work cooperatively within groups, appreciate different cultures, imagine, and create.

Copies of the Standards of Learning were distributed to public schools throughout Virginia for teachers to use in developing curricula and lesson plans to support the standards. The standards are minimum requirements in the fine arts that set reasonable targets and expectations for what teachers need to teach and students need to learn. The standards set clear, concise, measurable, and rigorous expectations for young people. Schools are encouraged to go beyond the prescribed standards to enrich the curriculum to meet the needs of all students.

The Standards of Learning for the fine arts were developed through the efforts of classroom teachers, curriculum specialists, administrators, college faculty, professional artists, fine arts organization representatives, museum personnel, parents, and students. These individuals assisted the Department of Education in developing and reviewing draft documents. Opportunities for citizens to make comments with respect to the standards documents were provided through public hearings that were held at five sites across the state.

A major objective of Virginia's educational agenda is to give the citizens of the commonwealth a program of public education that is among the best in the nation and that meets the needs of all young people in the commonwealth. These Standards of Learning continue the process for achieving that objective.

Music

Standards of Learning

Goal

The goal of music education is to empower students to experience music as a source of personal enrichment, as a vehicle for the constructive expression of human emotions, and as a unique intellectual discipline. This goal will be attained through a structured, sequential program of study.

Students will develop an intellectual understanding of music through experiences in singing, moving, listening, and playing instruments. They will learn to read and notate music, and to create compositions that transcribe their thoughts and emotions into concrete, musical forms of human expression. Students will exercise their critical thinking skills by investigating and analyzing all facets of the music discipline, employing both traditional modes of instruction and the latest technological advancements. Through active involvement in music throughout the public school years, the students of Virginia will build a foundation for a lifetime of participation in and enjoyment of music.

Organization

The scope and sequence of the Virginia Standards of Learning for music reflect the gradual progression in musical development that culminates in a high level of artistic attainment. The Music Standards of Learning are organized by areas and levels of instruction—Music K-12 (K, 1, 2, 3, 4, 5, 6-8, and 9-12), Instrumental (Beginning, Intermediate, Advanced, and Artist), and Vocal/Choral (Beginning, Intermediate, Advanced, and Artist). Within each area and level of instruction, Music Standards of Learning are organized by four related strands: *Perform*, *Create*, *Investigate*, and *Connect*.

Perform, the first strand, is the participative component of the standards. From the early grades through high school, this strand describes the involvement of each student in demonstrating mastery of music concepts at levels of increasing difficulty. The students will learn to participate in music as a musician through singing, playing instruments, and moving to music.

Create, the second strand, is the process whereby the students learn to use the notational tools of music to express their ideas, thoughts, and feelings through original composition. Create includes the exploration of individual approaches to vocal or instrumental improvisation.

Investigate, the third strand, involves students in the study and practice of music theory through music reading, notation, and sight-reading. It also requires the use of critical thinking skills to analyze the manner in which music is organized. Students will identify the style and distinctive characteristics of music which delineate each of the basic music historical periods, as well as the influence of twentieth century technology and compositional techniques employed in all genres of music. Students will also investigate the vocal timbres that are unique to children, adolescents, and adults. Students will be guided in the development of criteria for making informed artistic judgments about music, and the other arts, and for evaluating the role of music in society.

Connect, the fourth strand, involves the development of an understanding and awareness of the commonality between music and other disciplines. Students may relate music to foreign languages through music terminology and song texts; to poetry through common expressive elements; to mathematics through the principles of rhythm; to science through the study of acoustics; and to history/social science through the musical expression of various cultures and historical periods. Students will be encouraged to explore the elements of music in seeking to understand the interrelationships and commonality among the arts.

Although the strands are presented separately for organizational purposes, in practice they are integrated throughout all music instruction, regardless of classroom or ensemble experience. The four strands—Perform, Create, Investigate, and Connect—shape the music experience and guide the instructional process, K-12.

Music K-12

Introduction

The Music K-12 Standards of Learning identify content for the development of skills and knowledge in music for public schools in the Commonwealth of Virginia. Standards are identified by grade level for kindergarten through grade five, by grade clusters at the middle school level (grades six through eight), and by grade clusters at the high school level (grades nine through twelve).

The standards are to be used as guidelines and benchmarks for student achievement and to provide a variety of music experiences throughout the different grade levels and grade clusters. The four strands—Perform, Create, Investigate, and Connect—provide the bases for all instructional strategies that are appropriate to each category.

Music K-12 Standards of Learning provide the framework for students to learn ways in which the content of the separate disciplines within and outside the arts are interrelated with those of music. The strands are integrated through a variety of classroom and performance activities. Through individualized instruction and the provision of multiple educational opportunities, students will obtain valuable music skills and knowledge to prepare them for future educational, occupational, and personal endeavors.

Grades K-5

The Music K-5 Standards of Learning introduce basic music concepts through singing, playing instruments, moving, and listening. Students will gradually develop their singing voices, a repertoire of songs, and a sense of rhythm beginning with the steady beat and continuing toward complex rhythms and meters. Movement experiences are included as a means of demonstrating an understanding of concepts such as pitch, rhythm, and form. Listening experiences include traditional and contemporary classical works, American folk music, and music of other cultures. Through these experiences students will have the opportunity to apply and demonstrate an understanding of music concepts.

Instrumental

Introduction

Instrumental Music Standards of Learning are organized into four levels—Beginning, Intermediate, Advanced, and Artist. These four levels are based on the sequential development of skills, as opposed to grade level. Since students in the Commonwealth of Virginia begin instrumental instruction at varying grades, the use of these four levels allows for needed flexibility. These levels approximate the Virginia Band and Orchestra Directors Association (VBODA) Selective Music List for solo repertoire as Levels 1-2, 2-4, 4-5, and 5-6.

The standards are to be used as guidelines and benchmarks for student achievement. The four strands—Perform, Create, Investigate, and Connect—provide the organization for all of the instructional strategies in the standards. Opportunities are provided to explore the relationship between music, the other arts, and disciplines outside the arts.

In this revision the wording for the standards includes both band and string instruments. The descriptive lists of skills and activities related to the standards are organized with band content indicated before string content.

Beginning Level

Students will begin instruction on a band or string instrument of their choice. Instruction begins at any age and continues until the skill levels are mastered. Students will demonstrate proper care of the instrument and will be familiar with the technology of the instrument. They will demonstrate basic positions, tone production, fingerings, and will count, read, and perform the beginning level of music being studied (VBODA Level 1-2). Teachers will use available standard method books to deliver instruction in either homogeneous or heterogeneous class settings with limited ensemble work.

Vocal/Choral

Introduction

The Vocal/Choral Music Standards of Learning are organized into four sequential and developmental levels: Beginning, Intermediate, Advanced, and Artist. These four descriptors are based on vocal maturation and increasing musicianship skills. The Artist Level is the culminating vocal/choral experience in which the singer is prepared for future musical development and career opportunities. Since students in Virginia may be introduced to the choral ensemble experience at varying grade levels, the use of the four sequential and developmental levels allows for consistency and instructional flexibility.

The standards are to be used as guidelines and benchmarks for student achievement. The four strands—Perform, Create, Investigate, and Connect—provide the organization for these instructional strategies. Opportunities are provided for students to explore ways in which the content of the various disciplines, within and outside the arts, are interrelated with those of music.

Beginning Level

The Music Standards of Learning for the Beginning Level are designed for students experiencing their first vocal/choral class. A beginning choir may be found at any grade level within the elementary, middle, and secondary school setting as prescribed by the local school district.

The Beginning Level Standards of Learning emphasize fundamental vocal development, traditional notation, and the introduction to ensemble singing. These Vocal/Choral Standards of Learning require performance, creativity, and investigation at a fundamental level. Dance Arts Standards of Learning

Introduction

The Dance Arts Standards of Learning identify the content and skills required as essential components of the dance arts curriculum through the middle school and core high school courses. The standards are designed to be cumulative and progress in complexity by course from the middle school through the secondary level.

Throughout a student's dance arts education, specific content strands or topics are included. These strands are performance and production, cultural context and dance history, judgment and criticism, and aesthetics. It is through the acquisition of these concepts, content, and skills that the goals for the dance arts can be realized. A comprehensive dance arts program provides students with the ability to develop thinking skills and draw upon core academic areas to solve problems of creation, design, and execution. Through participation in the dance arts, students develop individual expression and the ability to work collaboratively to achieve common artistic goals.

The Dance Arts Standards of Learning provide a foundation for dance study at middle and high school levels and suggest the minimum criteria for a comprehensive dance education program. The standards are readily applicable to a variety of dance techniques and styles, including ballet, modern, jazz, and the dance of world cultures. Teachers are encouraged to go beyond the standards and develop instructional processes that exceed these minimum criteria.

Goals

The content of the Dance Arts Standards of Learning is intended to support the following goals for students:

- Develop the technical and artistic skills necessary for expressive dance performance and for the safe training and care of the body as an instrument;
- Creatively solve choreographic problems through use of the principles, processes, and structures of dance composition;
- Demonstrate knowledge of the elements of dance production and the safe use of materials, methods, and technologies;
- Understand dance within the contexts of history, culture, and other art forms, and the role of dance as a vehicle for human expression;
- Develop observation and critical thinking skills for the evaluation of dance works and their impact on society;
- Make connections between dance arts and other fields of knowledge, including awareness of the impact of technology on dance creativity and performance;
- Understand the variables of culture and experience that shape the aesthetics of individuals and societies; and
- Articulate personal aesthetic preferences and apply aesthetic criteria to the creation and evaluation of dance works.

Performance and Production

Students will develop a range of physical skills associated with dance performance and demonstrate an intellectual and physical understanding of safe, expressive dance technique. Through study of the principles, processes, and structures of dance composition, students will creatively design and implement choices that support the intent of their choreographic concepts. Students will participate in all aspects of dance production and demonstrate appropriate use of related materials, methods, and technologies.

Cultural Context and Dance History

Students will understand dance arts within the contexts of culture and history. Students will examine the interrelationship of current events, developing technologies, and dance in society. By viewing and evaluating the work of acclaimed choreographers and dance artists, students will become aware of the contribution of the dance arts to the quality of human experience.

Judgment and Criticism

Criticism in dance arts is based upon a thorough understanding of artistry and craft. Students will employ the processes of observing, listening, responding, reflecting, analyzing, interpreting, and evaluating while studying the dance arts. Through thoughtful examination, students will articulate an objective evaluation of dance works by analyzing the creative elements and the dance production as a whole. Students will apply these same processes to the creation and evaluation of their own choreographic work.

Aesthetics

The ability to make qualitative judgments about the dance arts depends upon the ability to experience a sensory, emotional, or intellectual response. Students must recognize the implementation of choreographic and production elements in performance in order to analyze their response and relate that response to the dance experience. Students will gain insight into different cultural perspectives and the factors that shape aesthetic responses.

Dance Safety

Safety must be given the highest priority in implementing the Dance Arts Standards of Learning. Students must know how to follow safety guidelines; demonstrate appropriate safety techniques; use equipment safely; and demonstrate dance theatre etiquette both on and off the stage while working individually and in groups. These guidelines apply in both the instructional and the performance settings.

Structurally sound training techniques, as well as wise selection of appropriate resources, materials, and dance experiences must be considered carefully for every instructional activity. Safe facilities for instruction and performance require careful planning, management, and the monitoring of student activities. Class enrollments and audience size must remain within the designed capacity of any instructional or performance setting.

Studio Safety in the Dance Instruction Setting

1. Every effort should be made to provide an instructional site appropriate to dance instruction.
2. Students should be instructed in proper studio rules, dress, and etiquette that provide a safe educational environment.
3. Instructors should stress safe technical practices for their students, including
 - emphasizing the importance of correct alignment and technical skills to minimize the risk of injury while enhancing technical accomplishment; and
 - selecting appropriate movement material to provide technical challenges with a minimum of risk to the student's physical safety.

Theatre Safety in the Dance Performance Setting

Dance production embraces a wide range of activities necessary for a successful performance, including

- design and implementation of lighting, costumes, properties, sound, and scenery;
- technical rehearsals with cast and crew;
- performances with audiences; and
- strike and clean-up of production materials upon completion of performance run.

Each of these activities requires knowledgeable teachers who are prepared to teach the safe use of equipment and facilities. The standards listed below are among those that should be followed to avoid damage or injury:

1. Technical elements designed and implemented according to safety guidelines
 - Stage curtains and drapes should have a flameproof rating and current certification.
 - Stage lighting circuits, dimmers, and fixtures should be properly maintained and regularly inspected (especially for ground continuity).
 - There should be a master switch for the electric supply for stage lighting equipment.
 - Amplified sound volumes should not exceed safe levels.
 - Damaged and worn out equipment should be immediately removed from service.
 - When dance productions require the construction of costumes, properties, and/or scenery, these activities should be conducted under the same conditions and practices used in industrial arts classrooms, including appropriate personal safety equipment such as gloves, goggles, hearing protectors, and dust masks.
 - Stage floor surfaces should be smooth, resilient, not slippery, and free of obstructions.
2. Rehearsals for cast and crew and performances with audiences
 - Technical rehearsals and performances should be staffed with a stage manager, production manager, and/or technical director.
 - A telephone with a direct outside line and emergency numbers posted nearby should be conveniently located in the theatre and studio settings.
 - Exits must be clear and unobstructed at all times.
 - Proper procedures for evacuation of the theatre should be discussed and rehearsed with cast and ushers.
 - During periods of occupancy, no exit door should be locked, chained, or obstructed from opening freely inside the theatre.
 - Exit and emergency lights must be in good operating condition.

- Fire extinguishers must be well-maintained and available at all times. Appropriate school personnel should be trained in their use.
 - Reasonable access to changing facilities and restrooms should be provided for performers.
3. Strike and clean-up
- Avoid scheduling strike and clean-up immediately after the final performance when fatigue and carelessness can result in accidents and injuries.
 - Strike and clean-up must be supervised by an adult with training in theatre safety (usually the technical director).

Theatre Arts Standards of Learning

Theatre Arts Standards of Learning

Introduction

The Theatre Arts Standards of Learning identify the content and skills required as essential components of the theatre arts curriculum through the middle school and core high school courses. The standards are designed to be cumulative and progress in complexity by course from the middle school through the secondary level.

Throughout a student's theatre arts education, specific content strands or topics are included. These strands are performance and production, cultural context and theatre history, judgment and criticism, and aesthetics. It is through the acquisition of these concepts, content, and skills that the goals for the theatre arts can be realized. A comprehensive theatre arts program provides students with the ability to understand their own responses and the responses of others to the many forms of theatrical experience.

The standards are not intended to encompass the entire curriculum for a grade level or course nor to prescribe how the content should be taught. Teachers are encouraged to go beyond these standards and to select instructional strategies and assessment methods appropriate for their students.

Goals

The content of the Theatre Arts Standards of Learning is intended to support the following goals that will enable students to:

- Think and act creatively by solving problems individually or collaboratively by employing originality, flexibility, and imagination;
- Develop the acting skills necessary for creative dramatic performance;
- Demonstrate knowledge of the elements of theatre production;
- Demonstrate an understanding of theatre arts in relation to history and culture;
- Develop critical skills to evaluate their work and the work of others;
- Demonstrate an awareness of and responsibility for the safe and ethical use of materials, methods, and technologies;
- Make connections between theatre arts and other fields of knowledge; and
- Demonstrate the ability to apply aesthetic criteria for making artistic choices.

Performance and Production

Students will apply concepts and skills that are inherent to theatrical performances. They will recognize problems related to all aspects of theatrical presentation. They will design and implement solutions that are consistent with form and expressive intent. Through study and practical experiences, students will develop the physical, conceptual, and intellectual skills associated with the crafts essential to theatre.

Cultural Context and Theatre History

Students will demonstrate their knowledge of the ways in which cultures and theatre have related throughout history and are interacting today. They will demonstrate an understanding of the ways that other disciplines and their related technologies influence theatre and are correspondingly influenced by theatre. It is essential that students demonstrate the ability to approach the manifold creative tasks associated with theatre to attain group objectives.

Judgment and Criticism

Criticism in the theatre arts is based upon a thorough understanding of the art and craft of theatre. Students are expected to thoughtfully examine, make judgments, and derive meaning from the theatre arts. Students will apply processes that involve observing, listening, reflecting, analyzing, interpreting, and making judgments. These skills are required for creating and producing as well as for judging or evaluating a finished product.

Aesthetics

The ability to make qualitative judgments in theatre arts depends upon a student's ability to perceive, to experience an emotional response, and to relate that response to the actual qualities of the theatrical experience that generated it. Participation in a range of artistic experiences enables students to develop an understanding of different cultural philosophies and factors that may alter responses. Such understandings are critical to the development of a personal philosophy of theatre arts and aesthetic sensitivity that focuses on the nature, meaning, and value of the arts.

Grades 6-12 Safety

In implementing the Theatre Arts Standards of Learning, students must know how to follow safety guidelines; practice theatre etiquette; demonstrate appropriate safety techniques; and use and care for equipment, stage properties, costumes, and facilities safely while working individually and in groups.

Safety must be given the highest priority in implementing the theatre arts instructional program in grades six through twelve. Correct and safe techniques, as well as wise selection of resources, materials, and theatre experiences appropriate to students' age levels, must be carefully considered with regard to the safety precautions for every instructional activity. Safe theatre facilities both classroom-based and auditorium-based require thorough planning, careful management, and constant monitoring of student activities. Class enrollments and audience size should not exceed the designed capacity of the room.

The theatre arts embrace a wide range of activities that are necessary to mounting a performance including:

- rehearsal of cast;
- design and implementation of scenery, lighting, costumes, properties, and sound;
- performances with audiences; and
- strike and clean-up of production materials upon completion of performance run.

Each of these activities requires knowledgeable teachers who are prepared to teach the safe use of tools and facilities. The standards listed below are among those that should be followed to avoid potential safety problems:

1. Rehearsal
 - Stage combat should be choreographed to eliminate unnecessary risk.
 - Dance rehearsals should be conducted on a smooth and resilient, but not slippery floor (e.g., sprung wood floors, marley floor).
 - Platforms and stair units should be secured from accidental movement and have sufficient railings.
 - Since rehearsals are often scheduled after regular school hours, a telephone with a direct outside line and emergency numbers posted nearby should be conveniently located in the theatre.
2. Design and implement technical elements safely
 - The construction and finishing of theatre scenery, costumes, and properties should be conducted under the same conditions and practices used in industrial arts classrooms, including appropriate personal safety equipment such as gloves, goggles, hearing protectors, and dust masks.
 - Stage curtains and drapes should have a flameproof rating and current certification.
 - Stage lighting circuits, dimmers, and fixtures should be properly maintained and regularly inspected (especially for ground continuity).
 - There should be a master switch for the electric supply for stage lighting equipment.
 - Amplified sound volumes must not exceed safe levels which can result in hearing damage.
 - All damaged and worn out equipment should be immediately removed from service.
3. Performance
 - Proper procedures for evacuation of the theatre should be discussed and rehearsed with cast and ushers.
 - Exits must be clear and unobstructed at all times.
 - All exit and emergency lights must be in good operating condition.
 - Fire extinguishers must be well-maintained and available at all times. Appropriate school personnel should be trained in their use.
4. Strike and clean-up
 - Avoid scheduling the strike and clean-up immediately after the final performance.
 - The most dangerous time of a production is the strike and clean-up, therefore it is strongly advised to begin the strike after a night's sleep to reduce accidents caused by fatigue and carelessness.

Visual Arts Standards of Learning

Introduction

The Visual Arts Standards of Learning identify the content and skills required as essential components of the visual arts curriculum at each grade level for Virginia's public schools. Standards are identified for kindergarten through grade eight and for four core high school courses, and are designed to be cumulative. They progress in complexity by grade level from kindergarten through the sequence of high school courses.

Throughout a student's visual arts education, specific content strands or topics are included. These strands are visual communication and production, cultural context and art history, judgment and criticism, and aesthetics. It is through the acquisition of these concepts, content, and skills that the goals for the visual arts can be realized. A comprehensive visual arts education program provides students with multiple means of expression as well as analytical skills to evaluate information that is conveyed by images and symbols.

The standards are not intended to encompass the entire curriculum for a given grade level or course nor to prescribe how the content should be taught. Teachers are encouraged to go beyond these standards and to select instructional strategies and assessment methods appropriate for their students.

Goals

The content of the Visual Arts Standards of Learning is intended to support the following goals that will enable students to:

- Select and use art media, subject matter, and symbols for expression and communication;
- Know the elements of art and the principles of design and how they are used in the visual arts;
- Solve visual arts problems with originality, flexibility, fluency, and imagination;
- Understand the relationship of the visual arts to history, culture, and other fields of knowledge;
- Use materials, methods, information, and technology in a safe and ethical manner;
- Perceive, reflect upon, and evaluate the characteristics, purposes, and merits of their work and the work of others;
- Identify, analyze, and apply criteria for making visual aesthetic judgments; and
- Develop an aesthetic awareness and personal philosophy regarding nature, meaning, and value in the visual arts.

Visual Communication and Production

Students will develop and communicate ideas by choosing and evaluating subject matter and symbols. They will develop fluency in visual, oral, and written communication using art vocabulary and concepts. Through art production, students will express ideas and feelings in two-dimensional and three-dimensional art forms and gain respect for their own work and the work of others. Students also will demonstrate safe and ethical practices in the use of art materials, tools, techniques, and processes.

Cultural Context and Art History

Students will see the visual arts in relation to history and culture through the investigation of works of art from different times and different places. Through the study of works of art and the artists who produced them, students will learn to appreciate the role the visual arts play in communicating historical and cultural beliefs and ideals.

Judgment and Criticism

Students will examine works of art and make informed judgments about the works of art based on established visual arts criteria. Through the understanding of visual arts principles and processes, they will be able to use a variety of thinking frames to analyze the visual qualities and interpret the meaning of works of art. They will also employ critical evaluation skills in the production of their works of art.

Aesthetics

Students will reflect on and analyze their personal responses to the expressive and communicative qualities of works of art. They will understand that their background, knowledge, and experiences influence their feelings and emotions. Through the examination of issues related to the visual arts, students will draw conclusions and reflect on the nature, meaning, and value of art based on their dual roles as both creator and viewer of art.

K-12 Safety

In implementing the Visual Arts Standards of Learning, students must know how to follow safety guidelines; demonstrate appropriate classroom safety techniques; and use materials, equipment, tools, and art spaces safely while working individually and in groups.

Safety must be given the highest priority in implementing the K-12 instructional program for visual arts. Correct and safe techniques, as well as wise selection of resources, materials, and equipment appropriate to age levels, must be carefully considered with regard to the safety precautions for every instructional activity. Safe visual arts classrooms require thorough planning, careful management, and constant monitoring of student activities. Class enrollments should not exceed the designed capacity of the room.

Teachers must be knowledgeable of the properties, use, storage, and proper disposal of all art materials that may be judged as hazardous prior to their use in an instructional activity. Art materials containing toxic substances that can cause acute or chronic health effects are prohibited from use with students in pre-kindergarten through grade six or up to twelve years of age. All hazardous art materials are required to be tested by the manufacturer and exhibit safety labeling: “Conforms to ASTM D-4236,” “Conforms to ASTM Practice D-4236,” or “Conforms to the health requirements of ASTM D-4236.”

Toxic materials can be more harmful to children than to adults. Since children are still growing and developing, their bodies can more readily absorb toxic materials that can cause more damage than in adults. Since children are smaller, an amount of a toxic material would be more concentrated than in an adult’s body. Children are also at higher risk because of their behavior. Children may not understand why it is important to be careful when using harmful materials. Also, some young children may put things in their mouths or swallow them. Toxic materials can enter the body in three different ways: inhalation, ingestion, or through

the skin. If toxic material does enter the child's body, it can result in an acute illness, chronic illness, cancer, allergic reaction, or death.

While no comprehensive list exists to cover all situations, the following guidelines from The Center for Safety in the Arts should be reviewed to avoid potential safety problems.

1. Avoid certain materials from student's art supplies for students in pre-kindergarten through grade six or up to twelve years of age. The general rules are listed below:
 - no dust or powders;
 - no chemical solvents or solvent-containing products;
 - no aerosol spray cans, air brushes, and so forth;
 - no acids, alkalis, bleaches, or other corrosive chemicals;
 - no donated or found materials unless ingredients are known;
 - no old materials—they may be more toxic and have inadequate labeling; and
 - no lead, metals, or cadmium products—these can be found in paints, glazes, metal work, and stained glass.

Substitution of nontoxic materials for hazardous materials should be made a priority where feasible with students over twelve years of age.

2. Treat high-risk students with special care and attention. Students who are physically or mentally disabled are at greater than normal risk from toxic materials. High-risk children include those who have visual or hearing problems, physical disabilities, asthma, take medication, or are emotionally disturbed. These high-risk students need special attention when using potentially harmful art supplies.
3. Make sure products are adequately labeled. Do not use any product that does not have a label or has a label that gives inadequate information. In general, the more the label describes the product, the easier it will be to use safely. The label should state how the product is to be used. It should also state what to do in case of an accident. Even if the label says "nontoxic," do not assume that it is completely safe. Art materials must contain one of the three ASTM-D 4236 labels listed above for assurance that they are safe products. If containers are changed, be sure to label the new container.
4. Purchase products in small containers. Smaller amounts of a product mean less exposure to the product. Also, larger amounts often are not readily used up. Leftover products need to be properly stored. Accidental poisonings may occur when stored products are left unattended. If such an accident should occur, call the local poison control center immediately.

Arts educators are responsible for the art materials they order and the safe use of those materials. Numerous safe art materials are available for use in place of materials identified as being toxic. Only art materials manufactured and labeled for use in the production of art projects and activities should be used in the execution of art projects within the classroom. Teachers of students twelve years of age or older should avoid the use of toxic hazardous art materials.
